Solve the problem that the phone earphone only has accompaniment or background sound, microphone invalid, etc.

OMTP (✓)

CTIA (✓)

* Don't support the line control function

FAQ

Q Does the sound card have noise and current?

- A:
1. Check if the interface is inserted.
 2. Check if there is any wireless interference around.
-

Q Why is the sound card hot?

- A: The USB sound card is an independent sound card with a smart chip, so the product will be slightly hot when working, which is normal.
-

Q Why am I plugged in without sound?

- A: Check if the earphones are plugged into the sound card. If the computer does not switch automatically, go to Control Panel - Sound - Play - select USB2.0 Audio to confirm.
