# FAQ

1

**Q** Why the TV has no sound while the VGA cable is properly connected?

**A** VGA cable transmits analog signal only, but doesn't support audio signal. You have to set additional connection from your laptop to TV via audio cable.

2

**Q** Does VGA (3+6) support the resolution of 1920\*1080?

**A** Yes. But on the condition that your device does, too.

3

**Q** Why the TV plays blank or blue screen while the VGA cable is properly connected?

**A** Please select VGA as the signal source on the TV menu.
