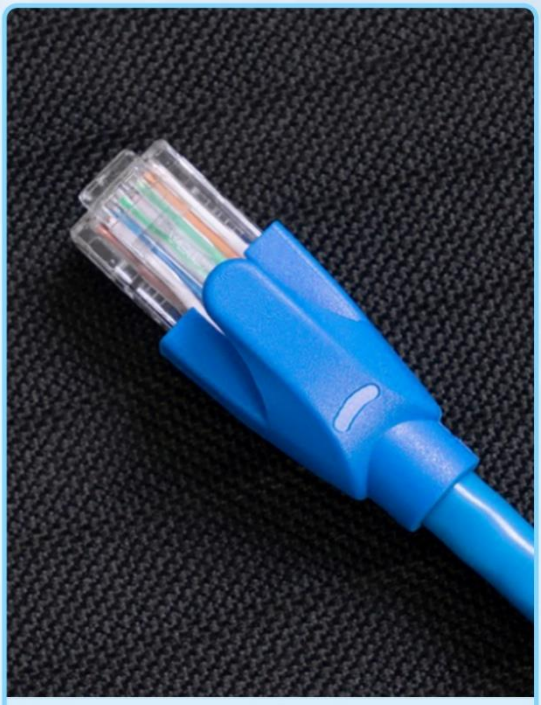
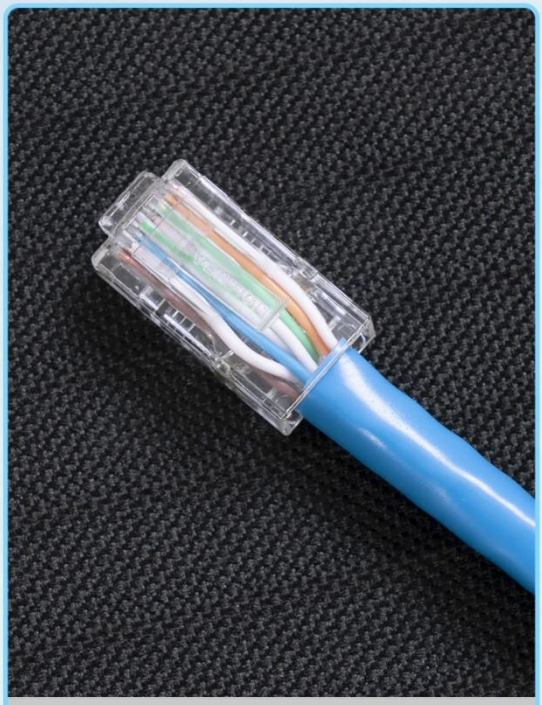
RJ45 Strain Relief Boots
Better Protection
10 colors available
More clear identification



With RJ45 strain relief boots

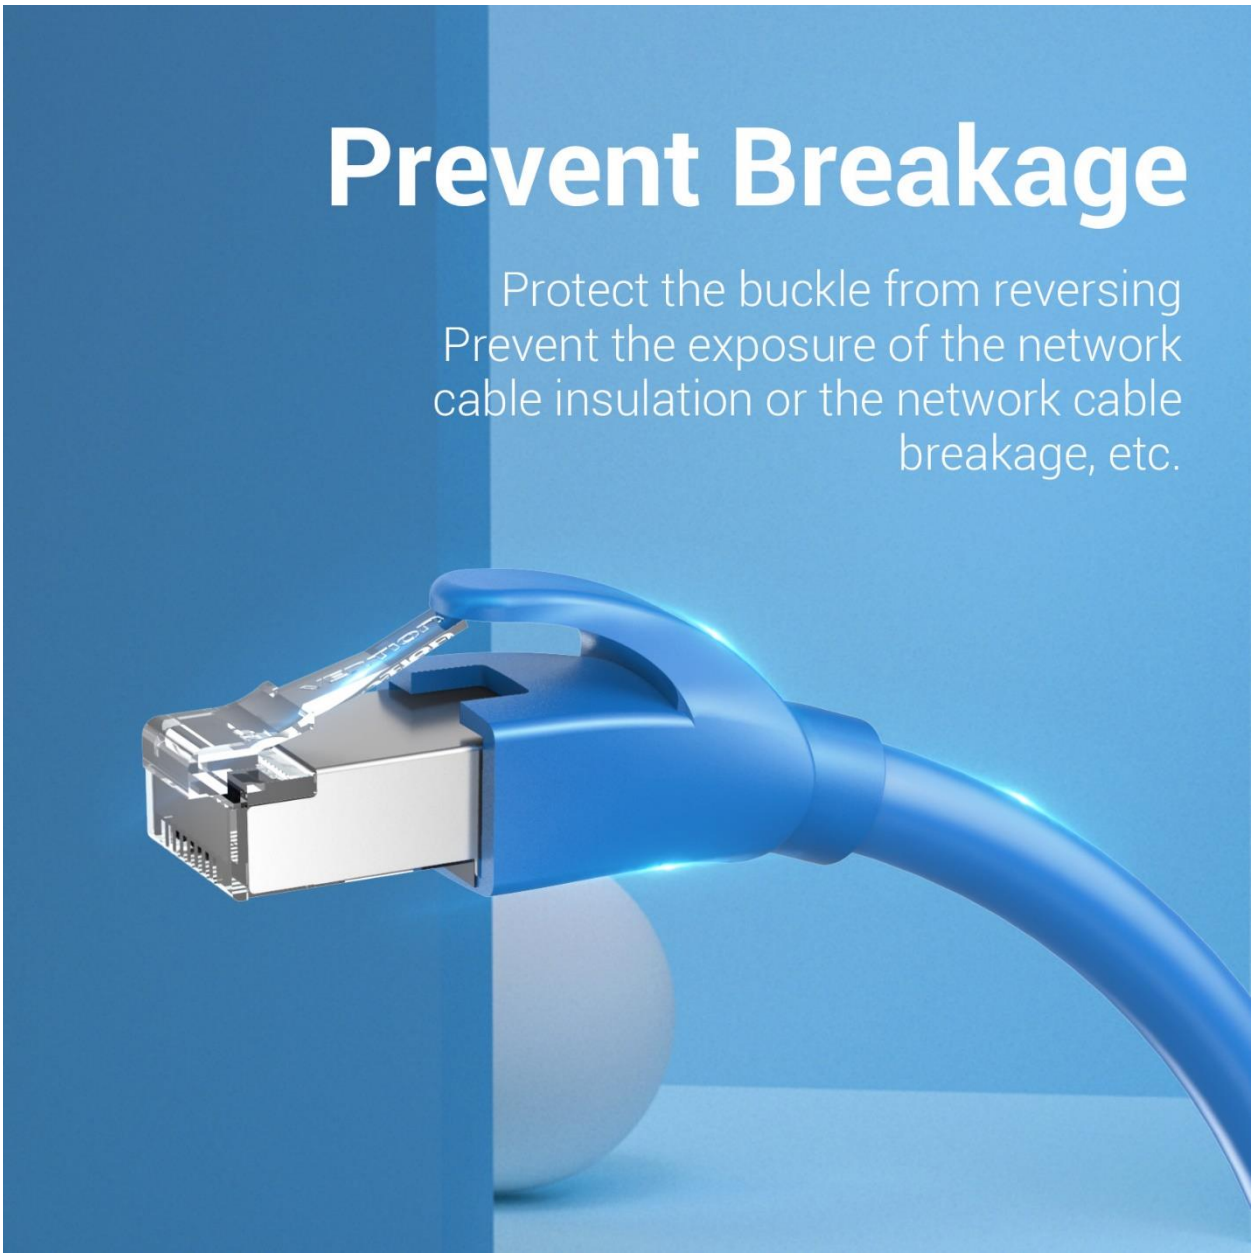
Protect cables from pressure



Without RJ45 strain relief boots

The exposed conductor is vulnerable to be damaged

Water-proof
and Dust-proof
Effectively prevent dust or water
from entering the RJ45 plug which
could cause poor contact
VENTION



Prevent Breakage
Protect the buckle from reversing
Prevent the exposure of the network cable insulation or the network cable breakage, etc.

Beautiful and Environmental-friendly

Cooperate with the RJ45 plug and
network cable to use, firmly without falling off

6.5mm

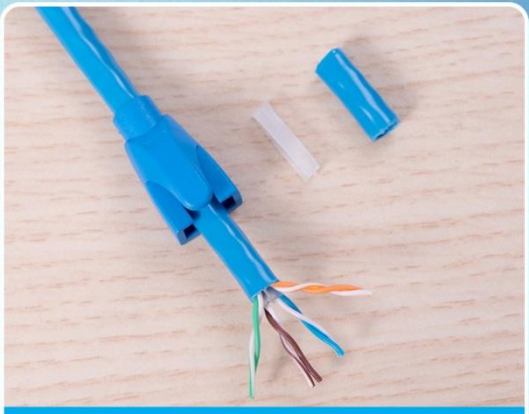
It is suitable for OD
6.5mm, does not support
OD more than 6.5 mm

Flexible and Easy for Installation and Wiring

Flexible and resilient

Method of Installation

1. Pass the cable through the RJ45 strain relief boots and strip the jacket with a wire stripper at about 2cm



2. Subtract the cross frame and anti-drawing in the network cable (ignore if do not have one)

3. Arrange and cut the cables accordingly (in the sequence of 568A/B) （reserve about 1.5cm）

4. Insert the flattened cable into the front part of the RJ45 plug

5. Buckle the RJ45 strain relief boots onto the RJ45 plug, put it into the crimping tool to press the interface, and push it into place for crimping

6. The finished cable is released
