Interface Technics: Nickel-plated	Power Supply: 3A
Transmission Speed: 480Mbps	Warranty: 1 Year
Conductor: Tinned-copper	Packing: Color Box

Tips

Q

Is it normal to have slight moving when the cable is plugged in?

A

The product is in strict accordance with the original production standard, as the contact surface of the C side is relatively small, slight moving is normal and does not affect the function and firmness of the product.

Q

Why does it beeps once and sometimes twice when plug in? Is it normal?

A

It is normal, the product adopted apple's original chip, both situation are normal phenomenon.

Q

Why does it get slower when the charging process reaches 80% ?

A

When the battery is charged to 80%, the internal chip will automatically control the flow of current, in order to extend battery's lifespan.

Q

In the PD car charger kit, when the phone system is 13.1.1 or above, why can't it charge properly via dual car charger port?

A

Due to the compatibility of Apple 13.1.1 and above system, it can't charge properly via two ports simultaneously, while the single port fast charging is in normal. Please kindly understand as the product chip is being upgraded.
